City of Memphis – eDiscovery Solution
RFP # SAIC CoM 2014 RG R105712

Answers to Questions

	<u>RFQ Section</u>	Question	Response
1.		Can the solution be cloud-based instead of residing in the CoM local data center?	The City of Memphis is open to this option but would need to be reviewed and discussed. Please submit appropriately for your intended solution. (Or for both options if you prefer.)
2.	2	What is the projected growth rate of retained data?	2.5 TB per year.
3.	2	How many users' data is archived on the current platform?	All mailboxes, (the CoM Enterprise), are included in eDiscovery.
4.	2	How many users on the current Exchange platform?	11,165 Mailboxes
5.	2	How long do they need to retain archive data?	The city has a one year retention policy however the legal hold would alter this if the eDiscovery is generated before the 1 year retention date is reached
6.	2	Can the current platform export the data as PST files per user?	Yes.
7.	2	Interface speed of the current platform?	Datacenter LAN speed. 1Gb.
8.	2	Is the exchange platform distributed or centralized?	Centralized
9.	2	Do you desire an on premise vendor managed deployment or a vendor hosted solution?	The City of Memphis is open to both options but would need to be reviewed and discussed. Please submit appropriately for your intended solution. (Or for both options if you prefer.)
