IN RE INVESTIGATIVE SUBPOENA *DUCES TECUM*

COURT ORDER FOR INVESTIGATIVE SUBPOENA
PURSUANT TO TCA: 40-17-123

Proof by affidavit having been made before me by Sgt. Christopher Page that there is reason to believe that a criminal offense has been committed or is being committed and that requiring the production of documents or information is necessary to establish who committed or is committing the offense or to aid in the investigation and prosecution of the person or persons believed to have committed or believed to be committing the offense, it is therefore ordered, adjudged and decreed that the Clerk of this Court is to issue the attached investigative subpoena *duces tecum*.

AFFIDAVIT FOR SUBPOENA DUCES TECUM
PURSUANT TO TCA: 40-17-123

Personally appeared before me, Sgt. Christopher Paige, and made oath that he has good ground and belief, and does believe that:

1. A specific criminal offense has been committed or is being committed and the nature of such offense: On 1-07-2023 at 2030 hours, Tyre Nichols was transported by MFD unit #28 from Raines and Ross Rd. Investigators need the EMT records and run sheet because Tyre Nichols later succumbed to his injuries after his interaction with Memphis Police. This incident is filed under report number 2301005186ME.
2. The production of the items requested will materially assist in the investigation of the specific offense committed or being committed: Death of Unknown Causes
3. The custodian of the documents requested and the person, persons, or corporation about whom the documents pertain: Memphis Fire Department
4. The specific documents requested to be included in the subpoena: EMT records and run sheet from MFD Unit #28
5. The nexus between the documents requested and the criminal offense committed or being committed: On 1-07-2023 at 2030 hours, Tyre Nichols was transported by MFD unit #28 from Raines and Ross Rd. Investigators need the EMT records and run sheet because Tyre Nichols later succumbed to his injuries after his interaction with Memphis Police. This incident is filed under report number 2301005186ME.
