Accounting Valuation under GASB No. 67 for the Plan Year Ending June 30, 2016

Accounting Valuation under GASB No. 68 for the Fiscal Year Ending June 30, 2016

September 22, 2016

Mr. Brian Collins
Director, Division of Finance
City of Memphis
125 North Main Street
Memphis, Tennessee 38103

Dear Mr. Collins,

We are pleased to present this report containing the results of the July 1, 2016 actuarial valuation of the City of Memphis Retirement System ("the Plan"), pursuant to our engagement letter with the City of Memphis ("the City") dated July 26, 2016.

The City of Memphis retained PricewaterhouseCoopers LLP ("PwC") to perform an actuarial valuation of the Retirement System for the purpose of calculating accounting results in accordance with Governmental Accounting Standards Board Statement No. 67 (GASB 67) for the Plan's fiscal year ending June 30, 2016 and Governmental Accounting Standards Board Statement No. 68 (GASB 68) for the City's fiscal year ending June 30, 2016. In addition, these results were prepared in accordance with Governmental Accounting Standards Board Statement No. 82 (GASB 82), which is an amendment of both GASB 67 and GASB 68. The City of Memphis also requested that we prepare the Memphis-Shelby County Airport Authority's ("Airport Authority") proportionate share of certain accounting and reporting requirements pursuant to GASB 68.

This valuation has been conducted in accordance with the required Actuarial Standards of Practice as issued by the American Academy of Actuaries.

Actuarial calculations under GASB 67 and GASB 68 are for purposes of fulfilling the Plan's and City's financial accounting requirements only and not suitable for any other purposes. The calculations reported herein have been made on a basis consistent with our understanding of GASB 67 and GASB 68, as amended by GASB 82.

In preparing the results presented in this report, we have relied upon information the City of Memphis provided to us regarding plan provisions, plan participants, unaudited plan assets, employee and employer contributions and benefit payments. The census data and plan asset information used in calculating the results herein were collected as of June 30, 2016. While the scope of our engagement did not call for us to perform an audit or independent verification of this information, we have reviewed this information for reasonableness. The accuracy of the results presented in this report is dependent upon the accuracy and completeness of the underlying information.

GASB 67 and GASB 68 require that each significant assumption reflect the best estimate of the Plan's future experience solely with respect to that assumption. The City of Memphis has determined and taken responsibility for the actuarial assumptions and the accounting policies and methods employed in the valuation of obligations and costs.

A range of results, different from those presented in this report could be considered reasonable. Future actuarial measurements may differ significantly from the current measurement presented in this report due to a number of factors including but not limited to: plan experience differing from that anticipated by the economic and demographic assumptions, increases or decreases expected as part of the natural operation of the methods used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status), rounding conventions and changes in plan provisions or applicable law. Due to the limited scope of this report, an analysis of the potential range of such future measurements has not been performed.

HIGHLIGHTS OF THE ACTUARY'S REPORT

This report presents results of the July 1, 2016 actuarial valuation of the City of Memphis Retirement System and is intended to provide the City with certain accounting and disclosure information related to the Plan. Accounting information for the Memphis-Shelby County Airport Authority's proportionate share of certain accounting and reporting requirements pursuant to GASB 68 may be found in Appendix II.

This report also includes financial statement reporting information for the City of Memphis for the fiscal year ending June 30, 2016 in accordance with our understanding of Government Accounting Standards Board Statement No. 68, as amended by Government Accounting Standards Board Statement No. 82. As permitted under paragraph 20 of GASB 68, the City of Memphis uses a measurement date of July 1, 2016. The valuation was performed using census data as of July 1, 2016, provided by the City and summarized in Section III, assets as of July 1, 2016 and disclosed in Section IV, assumptions and methods disclosed in Section V, and reflects the plan provisions effective July 1, 2016 as summarized in Section VI.

b. Annual Benefits Payable	\$ 166,089,000	\$ 169,585,000
c. DROP Account Balance	\$ 15,576,000	\$ 18,479,000

¹ As of June 30, 2016, actives include 3,753 grandfathered participants (2,519 Police & Fire and 1,234 General employees).

² The *anticipated payroll* is equal to actual payroll during the prior year for members who are still active on the valuation date, adjusted for one year of assumed salary increases. It does not include compensation for members who have reached the age at which retirement is assumed to occur immediately. Nor does it include compensation for employees currently participating in the DROP.

³ The *actual covered payroll* is defined under GASB 82 to be payroll on which contributions to a pension plan are based. As pensionable pay is used for determining contributions under the plan, pensionable pay is shown above starting July 1, 2016. Prior to July 1, 2016 the gross payroll is shown, consistent with the requirements prior to the release of GASB 82. Note, *actual covered payroll* is for the year immediately preceding the valuation date.

NOTES TO THE FINANCIAL STATEMENTS UNDER GASB 67 AND 68

A. Selected Notes to the Financial Statements under GASB 67 and 68 (Cont.)

2. Significant actuarial assumptions and other inputs used to measure the total pension liability (continued):

h. Discount Rate The discount rate used to measure the total pension liability was 7.5% as of July 1, 2016, and is equal to the long-term expected return on plan investments. The projection of cash flows used to determine the discount rate assumed that City contributions would be made at the actuarially calculated amount computed in accordance with the current funding policy adopted by the City, which requires payment of the normal cost and amortization of the unfunded actuarially accrued liability in level dollar installments over 30 years utilizing a closed period approach. Pursuant to The Public Employee Defined Benefit Financial Security Act of 2014, the City will phase into funding 100% of the actuarially calculated amount over a 5 year period beginning with the fiscal year beginning July 1, 2015. Based on this assumption, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members.

i. Discount Rate Sensitivity	<u>1% Decrease (6.5%)</u>	<u>Current Rate (7.5%)</u>	<u>1% Increase (8.5%)</u>
Net Pension Liability (000's)	\$ 816,872	\$ 527,226	\$ 283,984

j. DROP Program Approximate total accumulated DROP balances as of June 30, 2016 is \$18,479,000. This amount is included in the benefit obligation.

² The actuarially determined contribution is for the fiscal year end and is based on a discount rate assumption of 7.5%. It is developed in a separate funding report for the corresponding fiscal year.

³ The *actual covered employee payroll* is defined under GASB 82 to be payroll on which contributions to a pension plan are based. As pensionable pay is used for determining contributions under the plan, pensionable pay is shown above starting July 1, 2016. Prior to July 1, 2016 the gross payroll is shown, consistent with the requirements prior to the release of GASB 82. Note, actual covered employee payroll is for the year immediately preceding the valuation date.

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

A. Actuarial Assumptions (continued)

Marriage	80% of male General Employees, 50% of female General Employees, and 80% of Police and Fire Employees are assumed to be married. Wives are assumed to be three years younger than their husbands.
Death/Disability	Deaths and disabilities for active General Employees are assumed to be not line-of-duty. Deaths and disabilities for active Police and Fire Employees are assumed to be line-of-duty.
Form of Payment	It has been assumed that benefits will be paid in the normal annuity form applicable to the particular benefit. All grandfathered General Employees (1948 Plan or 1978 Plan only) who terminate prior to retirement age are assumed to elect to receive their employee contributions times the applicable return multiple. All nongrandfathered General Employees who terminate prior to ten years of service will elect to receive a refund of their employee contributions under the 1978 Plan times the applicable return multiple, plus the employee account balance under the 2016 Plan. Those who withdraw after ten years of service will elect to receive their entire accrued benefit as a lifetime annuity and commencing at age 60. All Police and Fire Employees who terminate prior to ten years of service will receive a refund of their employee contributions under the 1978 Plan times the applicable return multiple, plus the employee account balance under the 2016 Plan. Those who withdraw after ten years of service will receive their entire accrued benefit as a lifetime annuity and commencing at age 60.
Expense Load	None.
Changes in Assumptions	The healthy mortality assumption was changed from the Fully Generational RP-2014 Mortality Table with MP-2014 projection scale (adjusted by a 1 year set forward) to the Fully Generational RP-2014 Mortality Table with MP-2015 projection scale (adjusted by a 1 year set forward). The disabled mortality assumption was changed from the Fully Generational RP-2014 Disabled Mortality Table with MP-2014 projection scale (adjusted by a 3 year set back) to the Fully Generational RP-2014 Disabled Mortality Table with MP-2015 projection scale (adjusted by a 3 year set back).

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

B. Actuarial Assumptions Rationale

Interest Rate / Investment Return	Equal to the single rate of return as the City's funding policy requires fully funding the actuarially determined contribution by the 2020 fiscal year. It is developed pursuant to paragraphs 40 - 45 of GASB 67 and paragraphs 26 - 31 of GASB 68.
Future Salary Increases ¹	This assumption is set considering underlying inflation and historical salary increases coupled with management's best estimate of future expectations.
Cost of Living Increases	This assumption is set considering underlying inflation and historical cost of living increases coupled with management's best estimate of future expectations.
Mortality ¹	Mortality rates are set based on the SOA's recent study of US mortality trends for pensions and adjusted based on future expectations with periodic monitoring of observed gains and losses caused by mortality patterns different than assumed.
Disability ¹	Disability rates are set based on the plan's historical experience observed in the 2014 experience study and future expectations with periodic monitoring of observed gains and losses caused by disability patterns different than assumed.
Termination ¹	Termination rates are set based on the plan's historical experience observed in the 2014 experience study and future expectations with periodic monitoring of observed gains and losses caused by termination patterns different than assumed.
Retirement ¹	Retirement rates are set based on the plan's historical experience observed in the 2014 experience study and future expectations with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.
Marriage ¹	Marital rates are set based on the plan's historical experience and future expectations with periodic monitoring of observed gains and losses caused by marital patterns different than assumed.
Form of Payment	This assumption is based on historical experience and management's best expectations given the current plan provisions.

¹ Note, assumptions were updated based on an experience study performed on May 1, 2014 based on 10 years of census data (between 2003-2012).

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

C. Actuarial Methods for GASB 67 and GASB 68 Purposes

1. Actuarial Cost Method

The actuarial cost method is the Entry Age Normal Actuarial Cost Method. This method determines a normal cost rate as a fixed percentage of compensation for each active participant. The current year's normal cost is the participant's compensation multiplied by the normal cost rate. Annual contributions in this amount, from the date the participant entered the plan (or would have entered, if the plan had always been in effect and the participant had entered at the earliest possible date) until retirement, would be sufficient to provide for the actuarial present value of the participant's plan benefits. The total normal cost is the sum of the normal costs for all active participants.

The actuarial accrued liability is the present value of future benefits, for both active and inactive participants, less the present value of future normal costs.

2. Asset Valuation Method

Fair value of assets.

3. Changes in Actuarial Methods

No changes from the prior year.

SECTION VI - SUMMARY OF PLAN PROVISIONS

A. Summary of Plan Provisions: General Employees (continued)

Accrued Benefit (continued)

2016 Plan

An employee in the 2016 Plan will be required to receive the Normal Form of Annuity derived by both a market-rate cash balance account and a defined contribution account.

Market-rate Cash Balance Account

Annual allocations to the cash balance account are equal to a percentage of Compensation that varies by Years of Service pursuant to the following allocation schedule:

<u>Years of Service</u>	<u>Allocation %</u>
0.00 - 4.99	5%
5.00 - 9.99	7%
10.00 - 14.99	9%
15.00 - 19.99	12%
20.00 +	15%

Interest Credits applied to the cash balance account are based on an interest crediting rate equal to the investment return on plan assets *less* one percent (1.0%).

The Normal Form of Annuity is determined based on Actuarial Equivalence of five percent (5.0%) per annum and the applicable mortality table pursuant to IRC Section 417(e)(3) for the Plan Year.

Defined Contribution Account Balance

Annual allocations to the defined contribution account are equal to seven and one-half percent (7.5%) of Compensation which consists of a six percent (6.0%) of Compensation as an employee contribution and one and one half percent (1.5%) of Compensation as an employer contribution. Assets are participant directed and the investment earnings are included in the defined contribution account balance.

The Normal Form of Annuity is determined based on Actuarial Equivalence of five percent (5.0%) per annum and the applicable mortality table pursuant to IRC Section 417(e)(3) for the Plan Year.

SECTION VI - SUMMARY OF PLAN PROVISIONS

B. Summary of Plan Provisions: Police and Fire Employees (continued)

Accrued Benefit

2016 Plan

An employee in the 2016 Plan will be required to receive the Normal Form of Annuity derived by both a market-rate cash balance account and a defined contribution account.

Market-rate Cash Balance Account

Annual allocations to the cash balance account are equal to a percentage of Compensation that varies by Years of Service pursuant to the following allocation schedule:

<u>Years of Service</u>	<u>Allocation %</u>
0.00 - 4.99	8%
5.00 - 9.99	10%
10.00 - 14.99	12%
15.00 - 19.99	15%
20.00 +	18%

Interest Credits applied to the cash balance account are based on an interest crediting rate equal to the investment return on plan assets *less* one percent (1.0%).

The Normal Form of Annuity is determined based on Actuarial Equivalence of five percent (5.0%) per annum and the applicable mortality table pursuant to IRC Section 417(e)(3) for the Plan Year.

Defined Contribution Account Balance

Annual allocations to the defined contribution account are equal to seven and one-half percent (7.5%) of Compensation which consists of a six percent (6.0%) of Compensation as an employee contribution and one and one half percent (1.5%) of Compensation as an employer contribution. Assets are participant directed and the investment earnings are included in the defined contribution account balance.

The Normal Form of Annuity is determined based on Actuarial Equivalence of five percent (5.0%) per annum and the applicable mortality table pursuant to IRC Section 417(e)(3) for the Plan Year.

DEVELOPMENT OF ACCOUNTING INFORMATION FOR COST-SHARING EMPLOYERS - AIRPORT AUTHORITY

A. Historical Contributions to City of Memphis Retirement System

Per the direction of the City of Memphis and the Airport Authority, the allocation method for determining the Airport Authority's proportionate share of accounting information under GASB 68 is to use a historical approach equal to the ratio of the sum of Airport Authority employer contributions for the preceding five (5) fiscal years over the sum of the total employer contributions for the preceding five (5) fiscal years.

(1) Year Ending June 30	(2) Airport Authority	(3) City of Memphis	(4) Total
2011	\$ 819,000	\$ 19,313,000	\$ 20,132,000
2012	\$ 972,000	\$ 19,135,000	\$ 20,107,000
2013	\$ 1,014,000	\$ 17,954,000	\$ 18,968,000
2014	\$ 1,001,000	\$ 18,439,000	\$ 19,440,000
2015	\$ 996,000	\$ 45,219,000	\$ 46,215,000
2016	\$ 1,067,000	\$ 50,808,000	\$ 51,875,000

B. Development of Allocation Factor to Determine Airport Authority's Proportionate Share

a. Development of allocation percentage as of the <i>beginning</i> of the reporting period	
i. Airport Authority contributions for 2011 - 2015 fiscal years	\$ 4,802,000
ii. Total contributions for 2011 - 2015 fiscal years	\$ 124,862,000
iii. Allocation percentage as of the beginning of the reporting period (i) ÷ (ii)	3.85%
b. Development of allocation percentage as of the <i>ending</i> of the reporting period	
i. Airport Authority contributions for 2012 - 2016 fiscal years	\$ 5,050,000
ii. Total contributions for 2012 - 2016 fiscal years	\$ 156,605,000
iii. Allocation percentage as of the ending of the reporting period (i) ÷ (ii)	3.22%

APPENDIX I

NOTES TO THE FINANCIAL STATEMENTS UNDER GASB 67 AND 68

C. Selected Notes to the Financial Statements under GASB 67 and 68 for the Airport Authority (continued)

2. Significant actuarial assumptions and other inputs used to measure the total pension liability (continued):

h. Discount Rate The discount rate used to measure the total pension liability was 7.5% as of July 1, 2016, and is equal to the long-term expected return on plan investments. The projection of cash flows used to determine the discount rate assumed that City contributions would be made at the actuarially calculated amount computed in accordance with the current funding policy adopted by the City, which requires payment of the normal cost and amortization of the unfunded actuarially accrued liability in level dollar installments over 30 years utilizing a closed period approach. Pursuant to The Public Employee Defined Benefit Financial Security Act of 2014, the City will phase into funding 100% of the actuarially calculated amount over a 5 year period beginning with the fiscal year beginning July 1, 2015. Based on this assumption, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members.

i. Discount Rate Sensitivity	<u>1% Decrease (6.5%)</u>	<u>Current Rate (7.5%)</u>	<u>1% Increase (8.5%)</u>
Net Pension Liability (000's)	\$ 26,303	\$ 16,977	\$ 9,144

3. The Airport Authority's proportionate share of the Net Pension Liability (000's) as of July 1, 2016 are as follows:

i. Total Pension Liability	\$ 84,326
ii. Plan Fiduciary Net Position	<u>67,349</u>
iii. Net Pension Liability	\$ 16,977
iv. Plan Fiduciary Net Position as a Percentage of the Total Pension Liability	79.9%

2016	3.22%	\$ 16,977	\$ 18,420	92.2%	79.9%

¹ The information presented above is for those years for which it is available. It was prepared prospectively from the Plan's fiscal year ending June 30, 2014 for GASB 67 purposes and prospectively from fiscal year ending June 30, 2015 for GASB 68 purposes.

² Based on the cost sharing allocation percentage as of the measurement date.

³ The actual covered employee payroll is defined under GASB 82 to be payroll on which contributions to a pension plan are based. As pensionable pay is used for determining contributions under the plan, pensionable pay is shown above starting July 1, 2016. Prior to July 1, 2016 the gross payroll is shown, consistent with the requirements prior to the release of GASB 82. Note, actual covered employee payroll is for the year immediately preceding the valuation date.
