

City of Memphis

City of Memphis ADA Transition Plan

2025

The [Americans with Disabilities Act \(ADA\)\(External link\)](#) of 1990 is a comprehensive piece of legislation that both prohibits discrimination and guarantees that people with disabilities have the same opportunities as everyone else to participate in the mainstream of American life. The City of Memphis develops its buildings and infrastructure to meet these standards and where possible, updates facilities to meet these standards.

To better assess these needs, the City is developing an ADA Transition Plan as defined in Title II of the American with Disabilities Act, that focuses on identifying gaps and barriers in public Right-of-Ways (curb ramps, crosswalks, and sidewalks), parks (paths, restrooms, picnic areas), and City buildings (doorways, hardware, and walkways). This plan will also define priorities for investments that remove barriers and will guide planning and implementation of necessary accessibility improvements.

The City of Memphis' ADA Transition Plan is a dynamic, living document designed to evolve as we continue to assess and improve accessibility throughout the city. Updates are entered into the BlueDAG software platform, ensuring the plan remains current and reflective of ongoing progress.

The transition plan is updated regularly to capture new information, track completed actions and incorporate changes based on community needs and compliance requirements. It can be printed upon request at any time, in any accessible format, providing the most up-to-date values, statistics and initiatives as recorded in the database.

This living document underscores our commitment to accessibility, transparency and continuous improvement in alignment with the principles of the Americans with Disabilities Act.

1.0 Executive Summary

1.1 Commitment to accessibility and goals

City of Memphis places a strong emphasis on nurturing an inclusive and diverse community that embraces individuals from all walks of life. This commitment is deeply rooted in a longstanding history of initiatives aimed at ensuring that our services, programs, and activities are easily accessible to individuals with disabilities, with a focus on providing facilities and programs that cater to their needs.

1.2 Building on Prior Works

City of Memphis took significant steps towards ADA compliance by formulating an ADA Transition Plan years ago. That ADA Transition Plan involved the assessment of hundreds of its buildings with public access and the establishment of a policy regarding curb ramp installation, reflecting a strong commitment to accessibility. Subsequently, the other iterations of the City's ADA Transition Plan expanded upon this commitment, by assessing Parks and Recreation facilities, including recreation centers, tennis courts, golf courses, swimming pools, and other miscellaneous public-serving facilities. The City of Memphis' dedication to inclusivity and accessibility persisted, with ongoing integration of ADA standards for new construction into improvement plans, ensuring continued adherence to accessibility requirements.

1.3 A Note on Process

The Self-Evaluation's purpose is to ensure equal access to City of Memphis' programs, services, and activities in a timely manner, reflecting a commitment shared by its elected officials and staff who prioritize accommodating individuals with disabilities. This Self-Evaluation results from a comprehensive assessment of City of Memphis' PSAs, and select facilities. City of Memphis commits to making reasonable accommodations to PSAs in a fair and equal manner, to prevent discrimination based on disability, while avoiding fundamental alterations to the nature of these services. Furthermore, it pledges not to pass to individuals with disabilities, costs to cover accessibility, reinforcing its steadfast commitment to inclusivity and accessibility. The Self-Evaluation includes the creation of a Transition Plan which serves as a dynamic framework for ongoing enhancements and a roadmap for enhancing accessibility to all city facilities, programs, services, roadways, and sidewalks. The Plan is designed to be a living document, with regular updates and public publication, ensuring that residents are regularly informed of our advancements towards achieving complete ADA compliance.

1.4 Physical access issue cost to remediate summary

The table below provides an overview of the expenses associated with addressing the noted deficiencies identified by City of Memphis in their self-assessments of entity-owned streets and property.

Consolidated PROW Costing

Name	Estimated Total Remediation Cost	Priority	Method
No data available.			

Consolidated Facilities Costing

Name	Estimated Total Remediation Cost	Priority	Method
1. Quick Capture			
Accessible Routes			
Assembly Areas			
Parking - Off Street			
Toilet and Bathing Rooms			

The projected expense for addressing the identified deficiencies is **TBD**, and all figures are presented in current dollar estimates. Adjustments for inflation will be necessary for future calculations. Simultaneously, efforts are underway to secure extra funding, aiming to rectify all documented deficiencies within **TBD**.

2.0 Introduction

2.1 Commitment to accessibility and goals

We the City of Memphis strive to, not only comply with the provisions and regulations defined by the Americans with Disabilities Act (ADA) and amendments; and the Rehabilitation Act and amendments, but to also make every attempt to help ensure that the spirit of these historical benchmark pieces of legislation are adopted into our everyday practices and activities. Therefore, we the City of Memphis are committed to the full and equal opportunity of all its citizens, including individuals with disabilities. We recognize that our community's continued vitality, strength and vibrancy is through the realization of the contribution of all its citizens. With this understanding we the City of Memphis have developed this Transition Plan as a guide to assist us in transitioning from our existing status to full physical accessibility regarding all programs, services and activities we provide to our citizens, especially our citizens with disabilities.

2.2 Legal Mandates and Responsibilities

2.2.1 Legislative Mandate

The Americans with Disabilities Act of 1990 and amendments provide comprehensive civil rights protections to qualified individuals with disabilities in the areas of employment, public accommodations, State and local government services, and telecommunications. A primary goal of the ADA is to ensure equal participation in public life for all Americans with disabilities. Title II of the Act covers programs, services and activities of public entities, such as the City of Memphis.

Under Title II, a public entity may not deny the benefits of its programs, services, and/or activities to individuals with disabilities by maintaining inaccessible facilities, which house these programs, services and activities. City of Memphis programs, services, and activities, when viewed in their entirety, must be made accessible to and usable by individuals with disabilities, except where to do so would result in a fundamental alteration in the nature of the program; result in undue financial and administrative burdens or threaten or destroy the historic significance of a historic property.

Adopted on July 26, 1990, the ADA is a federal civil rights law that provides protections for persons with disabilities against discrimination by both public and private entities. The ADA extends similar protections provided by Section 504 of the Rehabilitation Act of 1973 (504).

- Section 504 requires entities that receive federal financial assistance to ensure they do not discriminate against persons with disabilities when providing their services, programs and activities.

- The ADA prohibits discrimination on the basis of disability for operations conducted by State and local governments and for facilities owned by private businesses, even if no federal financial assistance is received.
- Title II of the ADA requires State and local governments to ensure their services, programs and activities are accessible to and usable by persons with disabilities.

2.2.2 Responsibility

City of Memphis during this process has completed an assessment of everything, including its programs, services, and activities; facilities; and current policies, practice and procedures. The self-evaluation identifies and corrects barriers to access that are inconsistent with its Title II requirements of the ADA. In the assessment City of Memphis has inventoried all facilities with public access, public right-of-way, and parks and recreational facilities within the City of Memphis jurisdiction. City of Memphis has also identified programs and services provided in facilities that are not within the jurisdiction of the City of Memphis. The City of Memphis is currently responsible for the following: approximately 300 Buildings, over 6,800 Pedestrian Right-of-Way miles, 150 Recreational Facilities and hundreds of Programs and Services. This document was designed to help City of Memphis adhere to the above ADA/504 requirements as they are defined by related regulations to develop and implement a Transition Plan.

2.2.3 Exceptions

Section §35.130 of Title II requires that each program, service or activity conducted by a public entity, when viewed in its entirety, be readily accessible to and usable by individuals with disabilities. The regulation makes clear, however, that a public entity is not required to make each of its existing facilities accessible (§35.150(a) (1)). Unlike Title III of the ADA, which requires public accommodations to remove architectural Findings where such removal is "readily achievable," or to provide goods and services through alternative methods, where those methods are "readily achievable," Title II requires a public entity to make its programs accessible in all cases, except where to do so would result in a fundamental alteration in the nature of the program or an undue financial and administrative burdens. The US Congress intended the "undue burden" standard in Title II to be significantly higher than the "readily achievable" standard in Title III. Thus, although Title II may not require removal of Findings in some cases where removal would be required under Title III, the program access requirement of Title II should enable individuals with disabilities to participate in and benefit from programs, services or activities in all but the most unusual cases.

In a broad context, the ADA does not require City of Memphis to undertake any action—whether related to employment, public accommodation, or the provision of its services, programs, and benefits—if it can demonstrate that such action would fundamentally alter the nature of its programs or activities, create a hazardous condition, or create an undue financial and administrative burden. The assessment of whether an undue burden would ensue must rely on a comprehensive evaluation of all resources at the

disposal of City of Memphis. Moreover, if the elimination of a specific barrier is deemed excessively burdensome, City of Memphis is obligated to explore alternative measures that would grant persons with disabilities access to benefits, services, or programs without incurring an undue burden. The final decision regarding undue burden determination is ultimately made by [Title and name of Person].

2.3 Desired Outcomes

The objectives of conducting a Self Evaluation include providing a comprehensive overview of City of Memphis's historical efforts towards accessibility, assessing its current accessibility status, and developing a long term plan to remediate barriers in a timely and attainable manner. City of Memphis seeks to increase awareness within its organization about the importance of accessibility through stakeholder inclusivity, policy updates, and the promotion of diversity and inclusion in each of its programs and service offerings.

3.0 Primary ADA Contacts

3.1 ADA Coordinator(s)

3.1.1 ADA Coordinator Information

De Keishia Tunstall,

Title II ADA COORDINATOR

3720 Knight Arnold Road

Memphis, Tennessee 38118

Phone: 901-636-4828

Email: dekeishia.tunstall@memphistn.gov

3.1.2 ADA Coordinator Responsibilities

The ADA Coordinator holds a central role in ensuring adherence to the Americans with Disabilities Act (ADA). Responsibilities encompass overseeing ADA policy implementation, conducting accessibility assessments, and providing education for employees. Serving as City of Memphis's point of contact for individuals with disabilities, the coordinator addresses concerns, develops inclusive policies, and ensures physical and communication accessibility. Collaboration with departments is vital to integrate ADA requirements seamlessly, while monitoring changes in regulations is crucial for sustained compliance. Additionally, the ADA Coordinator manages documentation, handles conflict resolution, and contributes significantly to fostering an inclusive environment that grants equal access to programs, services, and employment opportunities for individuals with disabilities.

3.2 Transition Plan Coordinator(s)

3.2.1 Transition Plan Coordinator Information

De Keishia Tunstall,

Title II ADA COORDINATOR

3720 Knight Arnold Road

Memphis, Tennessee 38118

Phone: 901-636-4828

Email: dekeishia.tunstall@memphistn.gov

3.2.2 Transition Plan Coordinator Responsibilities

The City of Memphis Transition Plan Coordinator has the responsibility and authorization to fully implement Barrier removal as defined by the finalized Transition Plan. The Transition Plan Coordinator will utilize existing City of Memphis departments, offices and related construction programs to implement capital improvements and maintenance programs for Barrier removal.

3.3 Grievance Manager(s) & Other Liaisons

3.3.1 Grievance Manager information

De Keishia Tunstall,

Title II ADA COORDINATOR

3720 Knight Arnold Road

Memphis, Tennessee 38118

Phone: 901-636-4828

Email: dekeishia.tunstall@memphistn.gov

3.3.2 Grievance Manager Responsibilities

To ensure the implementation of the Grievance process, City of Memphis has designated the ADA/504 Coordinator, to coordinate efforts laid out by the Transition Plan.

3.3.3 Other Roles and Liaisons

City of Memphis has a Liaison Committee composed of representatives from each department. The ADA Coordinator will work along with these individuals to resolve accessibility issues with programs and services under each department's purview. The ADA Coordinator also works with the Committee to coordinate implementing plans, procedures, and policies around City of Memphis' accessibility compliance goals.

4.0 Grievances

4.1 Introduction

City of Memphis has established an ADA grievance procedure set forth below and will take prompt and reasonable action to investigate and eliminate discrimination when found. Any person who believes that he or she has been subjected to discrimination disability in any of the entity's programs, services or activities may file a complaint with the City of Memphis ADA Coordinator.

4.2 Grievances

4.2.1 Grievance Procedure

4.2.2 Grievance Goals

The key objective for City of Memphis when handling grievances is to facilitate a prompt resolution to a grievance related to accessibility, guaranteeing fair and equitable treatment for individuals with disabilities. Transparency is crucial, and the grievance process must be communicated clearly to all stakeholders, educating them on how to submit grievances and the subsequent resolution steps. The process aims to not only address immediate concerns but also to prevent recurrence by identifying patterns and implementing preventive measures. Through continuous improvement based on feedback received, City of Memphis endeavors to enhance accessibility policies, procedures, and services. By prioritizing the resolution of grievances, City of Memphis seeks to demonstrate a commitment to addressing accessibility issues, and ultimately

that might impede the full participation of individuals with disabilities in programs and services. Documentation and tracking of modification requests contribute to accountability and transparency.

5.0 Self Evaluations of Programs, Services & Activities

5.1 Introduction

5.1.1 Accessibility and PSAs

There are two kinds of accessibility: Program accessibility and Physical accessibility. Absence of discrimination requires that both types of accessibility be provided. Physical accessibility requires that a facility be barrier-free. Barriers include any obstacles that prevent or restrict the entrance to or use of a facility. Program accessibility may include physical accessibility, but also entails all of the policies, practices, and procedures that permit people with disabilities to participate in programs and to access important information. Program accessibility requires that individuals with disabilities be provided an equally effective opportunity to participate in or benefit from a public entity's programs and services. Program accessibility may be achieved by either structural or on-structural modification methods.

5.1.2 Methodology

To comprehensively assess all programs and services provided by City of Memphis, each department head was tasked with presenting a full list of public programs, services, and activities under their purview. A standardized PSA (Program, Service, Activity) checklist, formulated based on the General Requirements outlined in 28 CFR 35.130-35.135, was employed to evaluate each program. Subsequent to the evaluation of PSAs, corrective recommendations were derived and implemented to remove barriers to access for the PSA.

5.1.3 Programs, Services, Activities

City of Memphis offers PSA's to its stakeholders through its many departments.

5.1.4 Summarized Results

City of Memphis regularly reviews PSA's it offers to the public. The following are summarized results of the barriers to access found in the assessments and resolutions implemented to bring the PSA offering into compliance:

5.2

Policies

5.2.1 Introduction

Policies may unintentionally create barriers to access. Policies provide guidance for decision-making at all levels of the organization. Ensuring these policies are inclusive helps guide decisions that impact individuals with disabilities, promoting fairness and equitable treatment. The review process aids in identifying and addressing these barriers, averting widespread issues that could impact a range of activities and services.

5.2.2 List of policies reviewed

City of Memphis reviewed its policies for accessibility. These policies cover a wide range of Entity policies towards website design, design standards for public right of ways, building codes, voting centers, communication, and land leases. A list of all policies reviewed is below:

TBD

5.2.3 Summarized Results and Conclusions

The following are the summarized results of the self-evaluation findings and corrective actions taken to bring the policies into compliance:

TBD

5.3 Recommendations

5.3.1 Recommended actions

To comply with requirements of the plan, the City of Memphis must take corrective measures to achieve program accessibility through several methods, including, but not limited to:

1. Relocation of programs to accessible facilities;
2. Modifications to existing programs so they are offered in an accessible manner;
3. Structural methods such as altering an existing facility;
4. Policy modifications to ensure nondiscrimination; and
5. Auxiliary aids provided to produce effective communication.

When choosing a method of providing program access, the City should attempt to give priority to the method that promotes inclusion among all users, including individuals with disabilities.

5.3.2 Staff training

City of Memphis provided staff training on the topic of the Americans with Disabilities Act (ADA) Regulations and disability awareness.

The intent of the training was to receive information on implementing the 2010 ADA Standards for Accessibility, understand when the new rules apply, how they differ from existing codes and if they are more stringent than the State or Building Codes. Which standard or code must be complied with and how they can be incorporated into your master planning to create a framework to meet ADA compliance consistently.

Overview of the access criteria and requirements mandated for state and local government staff interacting with the public. Best practices for sensitive and respectful interactions are explained. Communication topics include correct language and etiquette, appropriate use of terminology, and dealing with service animals in public places. The training concluded with a brief overview of maintaining accessibility for people with disabilities.

5.3.3 Community input and feedback process

The City of Memphis hosted in person and online meetings with individuals from the public to provide a summary of the self-evaluation process and to receive feedback on any accessibility concerns.

The City of Memphis also solicited feedback through their website from any interested groups regarding accessibility and disability advocacy.

TBD

6.0 Self Evaluations of Facilities

6.1 Introduction

6.1.1 Facilities Introduction

The City of Memphis recognizes that it must examine each program, service or activity to determine whether any physical barriers to access exist. It should identify steps that need to be taken to enable these programs to be made accessible when viewed in their entirety. The City of Memphis also understands that if a program Self-Evaluation determines that physical changes to existing facilities are necessary, those changes must be included in the transition plan.

As part of the City of Memphis Self Evaluation process, it has been determined that the following public buildings, facilities and pedestrian structures and features are required to be field surveyed to determine barriers to City of Memphis programs, services and activities. "Public Facility" is defined here as any building or other facility owned or governed by City of Memphis, that is open to the public or houses City departments or private businesses that meet with or conduct business with the public from that location. This includes parks, trails and sports fields.

6.1.2 Methodology

Field surveying will begin on or about **TBD**. Each surveyor will undergo mandatory training on equipment to be used, data collection methods, procedures, and ADA principles, including class and in-field instruction, and detailed training on the field survey web-based tool. Surveyors will follow the procedures outlined in the ADA Standards for Accessible Design and applicable City of Memphis Building Codes. Field surveyor activities will be spot checked by a City of Memphis selected expert who will ensure the quality of field assessments and data collection.

Completed data will be auto downloaded, in real time, into our accessibility management platform, BlueDAG, as each assessment activity is completed. The database program will consolidate all collected data into tables. The tables will be sortable by data types, locations, structural feature types, and by priority. BlueDAG will auto populate the data into individualized inspection reports pertaining to buildings, parks, parking lots, etc. Overall data from the individualized reports will auto populate into the City of Memphis Transition Plan, which will eventually be displayed as part of this document. Data from the field surveys will be cloud-base and stored by BlueDAG to ensure data protection. In addition to inspection data, an inventory of all public buildings with public access and that are either owned or governed by City of Memphis, will be created and maintained in the system.

Field surveyors will use the BlueDAG mobile application tool to collect information during field surveys. Information collection will include all features within buildings and

other facilities. Some of the type of information will include, but is not limited to the following:

- Measurements of all facility features of all buildings will include, but are not limited to:
 - Parking slopes, signage, markings, and location.
 - Exterior and interior accessible route slopes, changes in level, protrusions, width, and surface requirements.
 - Exterior entrances maneuvering clearances, signage, operable force, and hardware.
 - Restroom signage, clearances, fixture and dispenser locations, fixture and dispenser operable parts, compartment clearances, and other elements.
 - Interior elements such as, lobby counters, tables, interior doors, and signage.
- Other Facilities (Parks, Trails, and Sports Facilities):
 - Exterior accessible route slopes, changes in level, protrusions, width, and surface requirements.
 - Required number of playground/play structure equipment.
 - Trailhead signage, surface requirements, and other elements.
 - Review of assembly seating for sport facilities and other elements.

The City of Memphis will provide assignments to field surveyors based on buildings, parks, trails, and sports facility addresses/location. As field surveyors collect data, utilizing the BlueDAG mobile application, the application will auto generate longitude and latitude coordinates for each assignment and plot assignments onto the master database for ease of the ADA Coordinator to examine.

6.2 Facilities

City of Memphis has owns and manages **approximately 300 facilities and over 160 public access parks.**

Below is a list of City-Owned Properties.

7.0 Self Evaluations of Public Right of Way

7.1 Introduction

7.1.1 PROW Introduction

City of Memphis recognizes the importance of ensuring accessibility within the public right of way to facilitate equal participation in all programs, services, and activities. The City of Memphis undertook a comprehensive self-evaluation examination of public rights of way, including sidewalks, curb ramps, crosswalks, pedestrian signals, and other features situated within the public domain. City of Memphis is committed to implementing proactive design and express remediation of identified access barriers in order to create a fully accessible environment, thereby fostering an inclusive community experience.

7.1.2 Methodology

Field surveying will begin on or about **TBD**. Each surveyor will undergo mandatory training on equipment to be used, data collection methods, procedures, and ADA principles, including class and in-field instruction, and detailed training on the field survey web-based tool. Surveyors will follow the procedures outlined in the ADA Standards for Accessible Design and applicable City of Memphis Building Codes. Field surveyor activities will be spot checked by a City of Memphis selected expert who will ensure the quality of field assessments and data collection.

Completed data will be auto downloaded, in real time, into our accessibility management platform, BlueDAG, as each assessment activity is completed. The database program will consolidate all collected data into tables. The tables will be sortable by data types, locations, structural feature types, and by priority. BlueDAG will auto populate the data into individualized inspection reports pertaining to public right of way assets. Overall data from the individualized reports will auto populate into the City of Memphis Transition Plan, which will eventually be displayed as part of this document. Data from the field surveys will be cloud-base and stored by BlueDAG to ensure data protection. In addition to inspection data, an inventory of all public buildings with public access and that are either owned or governed by City of Memphis, will be created and maintained in the system.

Field surveyors will use the BlueDAG mobile application tool to collect information during field surveys. Information collection will include all features within the public rights-of-way. Some of the type of information will include, but is not limited to the following:

- Public Rights-of-Way
 - Inventorying if curb ramps are present at the corners of intersections.

- Documenting excessive slope and grade of the pedestrian access route, including sidewalks, driveways, curb ramps, and crosswalks.
- Identifying presence and the cause of abrupt changes in sidewalk.
- Identifying protruding objects that obstruct the pedestrian access route including utility boxes, signs, vegetation, street furniture, and other elements.
- Evaluation of transit stops, including, light rail, bus and other.

7.2 PROW feature type summary and counts

The City of Memphis has over 6,800 miles of public streets and 20,000 intersections to maintain and upgrade. It has been a priority for the City of Memphis to improve accessibility for pedestrians and the disabled through the expansion of an accessible sidewalk network. The City of Memphis has implemented several programs and policies, and developed funding mechanisms to address the tremendous system needs for accessibility, including:

- Ensuring all new transportation capital projects include pedestrian access and meet the current ADA design standards, as amended and the state building code;
- Completing annual updates of the Transportation Street Standards to address changes and clarifications on ADA design from the federal Access Board and to better incorporate pedestrian facilities;
- Providing funding in all pavement management overlay projects for building missing, or repairing existing ADA curb ramps and sidewalks;
- Requiring that all new developments and site expansions or improvements include ADA facilities and accessible features;
- Creating an on-going funding source for completing projects identified in the system inventory; and to address specific citizen requests and grievances;
- Engaging in the development of a revised Comprehensive Self Evaluation with policies that strive to meet the requirements of the ADA;
- Continuing to seek a funding program to complete the projects identified in the Capital Facilities Plan; and
- Continuing efforts to fully comply with all aspects of the ADA and Section 504, including the Administrative requirements of;
 - a. Identifying a responsible employee empowered to address and implement ADA and Section 504 compliance activities
 - b. Provide notice to the public
 - c. Develop and utilize a grievance procedure
 - d. Develop and implement a Self Evaluation
 - e. Develop and implement a Transition Plan

Out of the **6,800** miles of roadway in the Title II City of Memphis, field surveys are planned to determine the location of features that are inconsistent with adopted accessibility standards and code. As part of the field surveys, data will be collected

showing whether or not there were any existing curb ramps, and whether or not existing curb ramps met ADA standards, including slope, lip, ramp width, side flare slopes and landing area. Additionally, the field data will be collected to determine inconsistencies at crosswalks, pedestrian traffic signals, and other pedestrian features. This data will allow the Title II City of Memphis to create a list of missing curb ramps and a list identifying what elements of existing curb ramps that do not comply or pose barriers to individuals with disabilities.

According to initial assessments, the Title II City of Memphis will not have the funds to correct all problems discovered during the field surveys immediately. Therefore, the data collected will be prioritized, where the primary focus is given to intersections on arterial roadways without existing curb ramps.

Subsequently, the following criteria are used to help determine which intersections will be completed first:

- Proximity to government facilities
- Streets with higher traffic volumes
- Streets with public transit service
- Streets with pedestrian attractors like schools, parks and shopping
- Proximity to medical facilities
- Improved system connectivity

The Title II City of Memphis does allow exceptions to the criteria if it helps ensure public safety, is more efficient or maximizes the overall benefit and utilizes public funds in the most efficient manner.

8.0 Transition Plan

8.1 Introduction

8.1.1 Introduction to the Transition Plan

1. In the event that structural changes to facilities will be undertaken to achieve program accessibility, a public entity that employs 50 or more persons shall develop, within six months of January 26, 1992, a transition plan setting forth the steps necessary to complete such changes. A public entity shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the transition plan by submitting comments. A copy of the transition plan shall be made available for public inspection.
2. If a public entity has responsibility or authority over streets, roads, or walkways, its transition plan shall include a schedule for providing curb ramps or other sloped areas where pedestrian walks cross curbs, giving priority to walkways serving entities covered by the Act, including State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas.
3. The plan shall, at a minimum—
 1. Identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities;
 2. Describe in detail the methods that will be used to make the facilities accessible;
 3. Specify the schedule for taking the steps necessary to achieve compliance with this section and, if the time period of the transition plan is longer than one year, identify steps that will be taken during each year of the transition period; and
 4. Indicate the official responsible for implementation of the plan.
4. If a public entity has already complied with the transition plan requirement of a Federal agency regulation implementing section 504 of the Rehabilitation Act of 1973, then the requirements of this paragraph (d) shall apply only to those policies and practices that were not included in the previous transition plan.

8.1.2 Cost Summary by Barrier Type and Priority

The table below provides an overview of the expenses associated with addressing the noted deficiencies identified by City of Memphis in their self-assessments of entity-owned streets and property.

Consolidated PROW Costing

Name	Estimated Total	Priority	Method
------	-----------------	----------	--------

	Remediation Cost		
<i>No data available.</i>			

Consolidated Facilities Costing

Name	Estimated Total Remediation Cost	Priority	Method
1. Quick Capture			
Accessible Routes			
Assembly Areas			
Parking - Off Street			
Toilet and Bathing Rooms			

8.2 Funding

8.2.1 Funding Types

The ADA Transition Plan Implementation Program is envisioned as one that will use, to the maximum extent possible, existing and prospective funding programs and sources. The accessibility improvements and Finding removal will be funded by a variety of funding sources either as stand alone projects or as a minor component of a transportation improvement project. Possible funding programs and sources include the following:

Capital Improvement Funds

8.2.2 Funding schedule

Based on the funding types identified and budgetary funds already appropriated, the below funding schedule towards remediation has been developed. It is noted that funding sources may change, as well as appropriated funds, but to City of Memphis's best estimation, the following funding schedule represents what is expected to be available to complete remediation work.

Every Fiscal Year starting July 1

8.3 Remediation

8.3.1 Barrier Remediation Schedule

The final Rules and Regulations of the ADA describe the requirements for program accessibility (Code of Federal Regulations, Title 28, Part 35, Subpart D). A public entity shall operate each service, program or activity, when viewed in its entirety, so that it is accessible to and usable by individuals with disabilities. The ADA does not require the public entity to make all of its existing facilities accessible, nor does it require a public entity to take any action that would fundamentally alter the nature of a service, program or activity. Also, it does not require implementation of the ADA that would result in undue financial and administrative burdens. In such cases where documentation is provided in keeping with strict procedures outlined in the ADA, there are various methods that may be appropriate for providing program accessibility in lieu of making actual physical changes to facilities.

With these facts in mind, the first step in determining what structural changes to existing facilities are necessary is to develop an understanding of the specific public programs and activities occurring at existing facilities within the City of Memphis. It should be noted that this section is not intended to be a self-evaluation, as described in the ADA. A self-evaluation includes an analysis of all programs and services offered by a public entity. The Self-Evaluation may include communications, publications, employment and many other factors that are separate from proposed structural or physical modifications to facilities.

The first step in determining barrier removal will be to examine Findings in detail to establish how each barrier affects overall program accessibility and whether or not program accessibility can be achieved without removing the barrier or if other means of program accessibility exist. For example, if court rooms exist on the third floor of a building and only steps lead to the court rooms, then the courtroom program is inaccessible. In this situation determinations would need to be made regarding how the public court program can be made accessible. Barrier removal to the public court program could consist of the installation of a standard 2,000 lb passenger elevator; where technical infeasibility exists, such as the requirement for the removal of load bearing walls, then a limited use elevator may be an alternative. Additionally, other alternatives exist, public court proceedings could be provided at another alternate fully accessible location and new public court facilities could be constructed to ensure full accessibility. This represents only one example of a Finding to a public program and some of the alternatives that could be allowed to remove Findings in existing facilities.

Such program access determinations regarding barrier removal in existing facilities should be made prior to the beginning of barrier removal construction projects. It should

be understood that in many and, likely most, situations physical construction will be necessary to ensure program access and barrier removal. However, program access considerations should be determined in order to help ensure the most efficient usage of public funds.

Where barriers require construction activities and programs cannot be made accessible through alternate means, barrier removal methods and transitioning will be guided by the set of strategies below. The web-based BlueDAG program provides detailed information pertaining to each barrier and the associated corrective action needed to make each facility/element accessible where construction is required. These deficiencies are then included in upcoming modifications that may be administered through internal departments/staff or contracted means.

The City of Memphis ADA Coordinator has the responsibility and authorization to fully implement barrier removal as defined by the finalized Transition Plan. The ADA Coordinator will utilize existing City of Memphis departments, offices and related construction programs to implement capital improvements and maintenance programs for barrier removal. The following departments, offices and related construction programs will be utilized by the ADA Coordinator:

1. City of Memphis Engineering Division
2. City of Memphis Finance Division
3. City of Memphis Legal Division

With the full and complete understanding that the main purpose of a Transition Plan is to transition from a state of inaccessibility to that of full accessibility, as defined by the ADA and Section 504; the methods adopted by City of Memphis for barrier removal will ultimately be determined by the ADA Coordinator, feedback from the public, individuals with disabilities, and those organizations that represent individuals with disabilities. The ADA Coordinator, related staff and feedback organizations may deviate from barrier removal methods if doing so would help ensure public safety and maximizes the overall benefit and utilizes public funds.

8.3.2 Prioritization

Finding Removal Priorities

- Priority 1: Grievances from the public and, specifically individuals with disabilities will be the first priority for Finding removal, regardless of what building or facility the grievance pertains to, so long as, the building or facility is owned, operated or governed by the City of Memphis;
- Priority 2: Physical locations identified to be problem areas via public involvement, consumer surveys, and the Transition Plan comment period will be the second priority for Finding removal;
- Priority 3: The following information will determine Findings to be removed under the 3rd Priority:

- City of Memphis owned or governed Buildings, parks, trails and sports fields determined to have high density public activity, including facilities determined to be frequented by individuals with disabilities.
- Pedestrian facilities within the right of ways along Major roadways (Arterials or thoroughfares with a minimum 80-foot-wide right-of-way) and all pedestrian facilities within these right-of-ways, including but not limited to intersections and sidewalks along these arterials or thoroughfares; and
- Intersections and roadway segments serving Priority Level 3 buildings and facilities including:
 - Public schools, hospitals, health clinics and health centers, including those which serve individuals with disabilities;
 - Public housing, homeless shelters, senior facilities, rehabilitation facilities and various facilities which specifically serve individuals with disabilities, such as group homes;
 - Law enforcement facilities, transportation hubs, public agency service facilities, jails, and prisons
- Priority 4: The following information will determine Findings to be removed under the 4th Priority:
 - Street right of ways with minimum 60-foot-wide right-of-way and other roadways, and all pedestrian facilities within the right-of-way including, but not limited to, intersections and sidewalks along these highways; and
 - Intersection and roadways serving level 2 facilities, including:
 - ADA Title III Public Accommodations, such as, supermarkets, strip retail markets and retail centers;
 - Major employment sites; and
 - Housing complexes and apartments
 - The right-of-way along roadways serving industrial areas, single family residential areas and other right-of-way not listed in higher priorities.
 - Buildings and facilities that are owned, operated or governed by Insert agency name not defined in the 3rd and 4th priorities.

The finalized barrier removal schedule will be based on funding availability. Once funding has been determined, the following barrier removal schedule and activities will provide a guidance mechanism for construction activities:

Detailed descriptions of proposed access improvement projects are included in the BlueDAG Master Database. A table of Capital Improvement Projects will be included and a summary of the projects per year is shown in Table 3 below. The City of Memphis plans to allocate approximately **[TBD]** annually to implement the ADA Transition Plan and remove identified Findings to programs, and also plans to apply for competitive funds to accelerate the transition process.

The access improvement projects will be subdivided by fiscal year as part of a **[TBD]**-year implementation plan. It is estimated that this period would yield a degree of

compliance that could be described as compliance with the Barrier Removal Methods priorities #1, #2 and #3. It is felt that a detailed breakdown of projects past these periods would be inappropriate, since conditions would be subject to numerous changes over such a time span. It is anticipated that overall compliance with all use and Condition Priorities could be achieved in 25 to 30 years.

The locations of work are subject to review and recommendations by the City of Memphis, the ADA Coordinator, any established accessibility committees, and the public. Likewise, it is probable that specific locations and project groupings will need to be adjusted among the various years of the plan, after a more detailed review by the agencies departments, offices and related construction programs. Other breakdowns of proposed work locations and extent will be available, including by types of work or funding sources. It should be noted that the detailed field surveys undertaken form the basis of existing conditions requiring correction under the proposed projects. It should also be noted that the detailed reports include projects that may be part of the ADA Transition Plan work implemented and funded by other jurisdictions or municipalities.

Construction and soft costs given in both the detailed and summary tables of improvement projects should be considered schematic, order of magnitude costs, based upon the unit costs and estimating parameters developed specifically for this ADA Transition Plan. The costs include all incidental soft costs, such as engineering, bidding and permitting costs, utilities and other appurtenances and contingencies.

The detailed table of improvement projects does not necessarily depict the complete and exact locations of all sidewalks, driveway repair or buildings and other facilities work to be undertaken as part of the ADA Transition Plan, since much of this work will be determined by public input requests and will be evaluated in conjunction with intersection work or other construction projects.

Information of the Transition Plan for right-of-way, buildings, or other facility types can be found at the following link: {LINK TO Public BARRIERS}

8.3.3 Public Review

City of Memphis established an internal ADA Liaison Committee (ALC) in 2025 to assist with accessibility decision making involving numerous Divisions, Offices and Departments including, Police Services, Fire Services, Public Works, Animal Services along with other City Divisions. In order to help comply with the public input and involvement provisions of Title II, City of Memphis implemented an external Disability Advisory Committee (DAC) which consists of 13 committee members, including De Keishia Tunstall, ADA Coordinator. The membership of the Memphis Advisory Council for Citizens with Disabilities represents a diverse population from across the community by including individuals with disabilities and those who represent individuals with disabilities. MACCD provides input to City of Memphis ADA/504 policies, practices, procedures, project priorities, and methods of communicating with community advocates.

City of Memphis seeks extensive public involvement in all ADA-related activities including the development of new and revised notice to the public on the City of Memphis ADA compliance activities to help ensure individuals with disabilities have opportunity to provide feedback and comments, including how and where to provide such notice, methods of the provision of notice, and best practices in the provision of notice.

Citizens were and still are able to take advantage of the following outreach efforts:

- **Advisory Groups:** The ALC and DAC were formed and meet regularly for the purpose of reviewing documents and providing feedback pertaining to the Transition Plan. The advisory group act as a sounding board, where members review and provided feedback on project documents and submittals. In addition, the advisory groups work toward achieving consensus on project issues.
- **Outreach and accommodations available to persons with visual impairments:** The ADA Transition Plan is to be made available to persons who are visually impaired via large print text document and Braille master copy. Persons with visual impairments who have access to software that converts text to audio will be provided the document via email, floppy disks or CDs. Other auxiliary aids and services, specific to the individual's needs, are available upon request, by contacting the ADA Coordinator.
- **Web Site:** The City of Memphis web site is fully accessible and makes the Transition Plan available at www.memphistn.gov. By using the web site, the public is able to obtain information on the project's purpose, schedule and timeline, pedestrian/disability access consumer survey, archived articles, approved and revised documents and discussion papers, public involvement opportunities and contact information. In addition, the draft and final ADA Transition Plan will be posted on the City of Memphis web site for approximately 3 years after final approval and adoption.
- **Consumer Survey:** A pedestrian and disabled access consumer survey was developed and distributed to identify hotspot locations or physical barriers to public buildings and facilities. This process included distribution to persons with disabilities and those representing disability service organizations.

Requests for copies of the ADA Transition Plan and additional public comments should be directed to the City of Memphis ADA/504 Coordinator, De Keishia Tunstall, 3720 Knight Arnold Road Memphis, TN 38118, Telephone: 901-636-4828, E-mail: dekeishia.tunstall@memphistn.gov, TTY: 711. The ADA Transition Plan is provided in various alternative formats upon written request.

9.0 Notice

9.1 Public Notice Under the ADA

9.1.1 Notification of our Commitments

In accordance with the requirements of title II of the Americans with Disabilities Act of 1990 ("ADA"), City of Memphis will not discriminate against qualified individuals with disabilities on the basis of disability in its services, programs, or activities.

Employment: City of Memphis does not discriminate on the basis of disability in its hiring or employment practices and complies with all regulations promulgated by the U.S. Equal Employment Opportunity Commission under title I of the ADA.

Effective Communication: City of Memphis will generally, upon request, provide appropriate aids and services leading to effective communication for qualified persons with disabilities so they can participate equally in City of Memphis's programs, services, and activities, including qualified sign language interpreters, documents in Braille, and other ways of making information and communications accessible to people who have speech, hearing, or vision impairments.

Modifications to Policies and Procedures: City of Memphis will make all reasonable modifications to policies and programs to ensure that people with disabilities have an equal opportunity to enjoy all of its programs, services, and activities. For example, individuals with service animals are welcomed in City of Memphis offices, even where pets are generally prohibited.

Anyone who requires an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a program, service, or activity of City of Memphis, should contact the office of [name and contact information for ADA Coordinator] as soon as possible but no later than 48 hours before the scheduled event.

The ADA does not require the City of Memphis to take any action that would fundamentally alter the nature of its programs or services, or impose an undue financial or administrative burden.

Complaints that a program, service, or activity of City of Memphis is not accessible to persons with disabilities should be directed to De Keishia Tunstall, ADA Coordinator.

City of Memphis will not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the cost of providing auxiliary aids/services or reasonable modifications of policy, such as retrieving items from locations that are open to the public but are not accessible to persons who use wheelchairs.

9.1.2 Building Codes

The Title II City of Memphis currently utilizes all state and federal accessibility standards and codes in the on-site surveys and remedial efforts. This includes but is not limited to the 2010 ADA Design Standards and state building codes.
